Milling & Baking News

Weekly Journal for Breadstuffs Managers

1988 MILLING DIRECTORY/BUYER'S GUIDE

This 1988 Milling Directory/Buyer's Guide comprises two sections. The first is a continuation of the Directory of Milling which had its beginnings more than half a century ago and has been published by *Milling & Baking News* since 1973. The second is a Buyer's Guide of milling equipment and services, first published as a separate directory by *Milling & Baking News* in 1978.

The Milling Directory provides a comprehensive listing of companies and products in the milling industry, including daily flour milling and storage capacity, railroad service, executives in management and production, and wholesale and retail brands.

The statistical summaries beginning on Page 8 detail milling capacity by largest companies, by states and by type of flour.

The Buyer's Guide includes a complete listing of products and services for milling and an alphabetical list of companies producing and/or supplying these products to milling. Suggestions on how to use the Buyer's Guide appear on Page 89. The publisher assumes information provided by the companies included in the Buyer's Guide section to be an accurate list of the products and services offered by that company.

This Milling Directory/Buyer's Guide is unique in that each and every listing is verified by the companies listed for accuracy. Every effort has been made to present a publication free of errors and/or omissions. In the event that errors or omissions occur, the editors of *Milling & Baking News* would greatly appreciate communications to that effect so that corrections will be made in future editions.

DM = Durum Mills (18)
RM = Rye Mills (10)

UNITED STATES
Statistical Summaries

The 1988 Milling Directory of *Milling & Baking News* lists a total of 211 U.S. wheat flour mills, 18 durum mills and 10 rye mills. The wheat flour mills have total daily milling capacity of 1,120,736 cwts. This aggregate includes 843,606 cwts of hard wheat flour, 247,931 cwts of soft wheat flour, 40,205 cwts of whole wheat flour and 28,434 cwts of alternating capacity. Alternating capacity is shown in parentheses in the table below. Daily durum milling capacity listed in the directory is 96,540 cwts, with an additional 18,000 cwts of durum capacity alternating with wheat flour. Combining the wheat flour milling capacity of 1,120,736 cwts and the durum milling capacity of 96,540 cwts results in a wheat flour-durum aggregate of 1,217,276 cwts. Adding the 9,104 cwts of rye flour milling capacity in the directory brings aggregate of wheat flour-durum-rye capacity to 1,226,380 cwts.

Is it a coincidence that the "Miller-of-the-Year" uses our Control & Yield Management System?

Consider what we offer. . .and deliver!

Our integrated Control & Monitoring System is a modular system specifically designed for flour milling. The System consists of a family of microprocessor based controllers all tied together with a central computer which provides the operator interface, production status monitoring, report writing, and data storage.

Reliable control begins with good scale control and automated Yield Management. Our Control & Yield Management System delivers:

- tailored full extraction statements
- reporting capability for entire year
- interface to all brands of electronic scales
- conversion of dump scales to electronic
- built in expansion capability

Based on your specific needs we offer:

- interface to existing mill controls
- link to office or management computers

When ready, you can expand from this to our fully integrated Control & Monitoring System to include:

- enrichment feeder control
- automated wheat blending
- inventory control
- routing of finished products

We provide the tools needed in your milling operation to deliver:

- high production rates
- improved efficiency
- consistent and high quality flour
- timely deliveries

There is no coincidence - the installation of our systems will ensure that your capital expenditure is a profitable investment.

Call Len Vienneau at (416) 238-5957 to discuss your needs. Or write 5650 Tomken Road, Unit 10, Mississauga, Ontario, Canada, L4W 4P1, for more information.

since 1882 SIEMER MILLING COMPANY

WHAT IT TAKES TO GET IT RIGHT

Responsiveness, flexibility, attention to details, a desire to please—these are qualities that distinguish the star performer from the merely competent.

We produce soft wheat flour—for cakes, cookies, crackers, pretzels, batter and breading.

Our products, including New Century Hi Ratio Cake Flour and Gold Standard Cookie and Pastry Flour, adhere to a standard of quality that should be every miller's goal.

Our ability to deal quickly and congenially with your most demanding service requirements will make you doubly glad you're doing business with us.

When consistent product and reliable service are important to you, think of us. We know what it takes to keep our customers satisfied...and customers satisfaction is why we're in business.

EQUICHEM INTERNATIONAL

ADDING A WORLD OF DIFFERENCE TO FLOUR...

It all starts with flour. When the flour is properly conditioned, superior baked products result. To produce quality flour, use EQUICHEM's flour treatment and dough conditioners.

A staff of chemical experts, ready to help you with technical and individual assistance, blended a variety of compounds:

- **Bromoflex 50** — Potassium bromate 50%
- **Rapidox** — Maturing agent
- **Famyl** — Fungal alpha amylase
- **Oxilux** — Bleaching agent
- **Nutri-Mix** — Vitamin premix

EQUICHEM MEANS EQUIPMENT

Plus, you can now save money investing in the flour conditioning equipment you used to rent. EQUICHEM offers a unique option to millers purchasing any of EQUICHEM's quality dough conditioners and flour treatment products. For details, contact:

EQUICHEM INTERNATIONAL, INC.

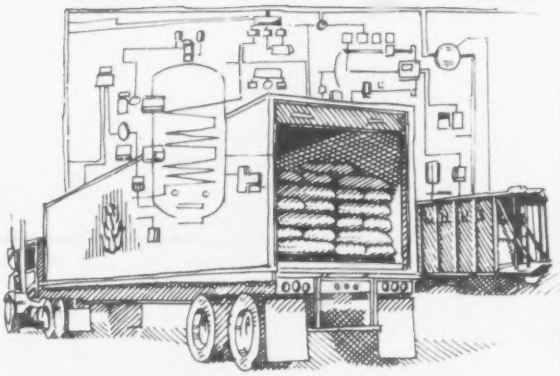
We Deliver Bulk or Bag



By Truck or Rail.

At Amber Milling, we offer you the flexibility of our custom blending and special formulas—and we deliver in bulk or bag, by truck or rail. That's our way of making sure you get what you want, when and where you want it.

Our product is recognized as the finest in the industry. This holds true whether it is our Semolina or Durum Flours, or one of our many specialty products such as:

- ***Wheat Germ*** high quality flaked or embryo
- ***Bran*** human consumptive ground Durum
- ***Clears*** first and second clear flour

At Amber Milling, we deliver quality. It's a tradition we've been establishing for more than 55 years. Choose Amber Milling, and we'll deliver ...on time.

THE AGRICHEM TROUBLE-SHOOTER

PHIL SCHAMBERGER — PRESIDENT

Last seen traveling through Africa, the Orient, South America, the Caribbean... and now the United States. He is bringing with him a wealth of experience.

His specialty is improving your flour quality with optional contracts or direct purchase...the choice is yours. He can also help with that occasional problem of inferior wheat.

AgriChem, Inc. is a leading exporter and supplier of flour additives, including:

AGRIMALT (Fungal Amylase)
MATURAG (Maturing Agent)
VITAG (Vitamin Enrichment)
BROMAG & BROMAG 50 (Potassium Bromate-23%-50%)
AGRILITE (Bleach)
AGRICOM (Custom Blends)

Our specialty: Upgrading marginal quality flour; helping flour millers produce excellent quality flour utilizing less costly varieties of wheat by adding —

Ascorbic-E — a specially protected "encapsulated" natural improver, with controlled action for maximum benefit. Gives better volume and texture.

Gluten-M — high quality wheat gluten, treated with emulsifiers for improved action in strengthening weak doughs.

Gluten-plus — a formulated blend of Ascorbic-E with Gluten-M. One volumetric feeder supplies just the right proportion of both products.

CONTACT US:

AgriChem, Inc.

755 New York Avenue • Huntington, New York 11743 U.S.A.
Telephone: 516/549-4260 **TELEX 22 1678 AGRI UR**

Quality's getting tougher and tougher,
Both in regulation and technical skills.
The challenge for millers gets rougher
As organics and hybrids are milled.

With two hundred soft wheats available
And pesticide treatment debarred,
Grades and residues are fallible;
It's hard to avoid the petard.

Twenty or more streams of flour
To blend, mix, or treat is complex,
But it gives the controllable power
To meet the customers' specs.

Now add proteinaceous creativity
To aberrant enzymatic hyporecessivity
Which enhances qualitative sensitivity
As a statistical processing contrivity.

Yet when quality and service is roughest
And that's all a miller can sell;
And processing quality is toughest
Tenacity and knowledge excel.

No one likes to be taken for granted.

(But we're getting used to it.)

For over seventy-five years, we've been producing the finest quality bakery flour products possible. And we intend to keep right on producing products our customers can rely on year in and year out. No surprises. Just consistent quality.

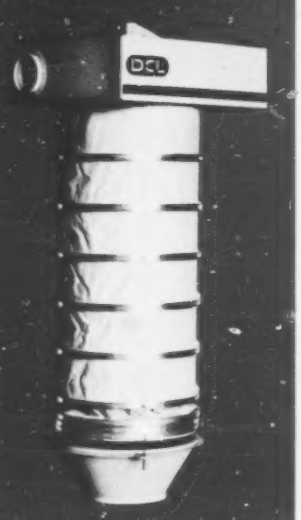
a leader in innovative bulk loading system design



DCL's advanced bulk loading systems are at work throughout the world, solving some of industry's most difficult problems — eliminating dust hazards and increasing loading speeds.

Our exclusive Rhino Hyde® urethane inner stacking cones plus innovative design features make our spout the best alternative.

Our success with repeat customers is the result of DCL designed systems that carefully consider every aspect of loading terminal operation.

For more detailed information, call or write Reinhard Matye, DCL, P.O. Box 125, Charlevoix, Michigan 49720, (616) 547-5600.

DCL

— ANNOUNCING —

We have expanded our quality line of products to include a complete size range of slide gates. Also ask us about aeration conveyor components and systems.

DRAMATIC DIFFERENCE IN DIFFERENTIAL DRIVE

– non-metallic driven gears in Jaymark roller mill differentials
– eliminate oil lubrication
– dampen roll noise and vibration
– provide overload protection

– fits in roller chain and gear cases
– field proven since 1983
– manufacturers of the "not yet famous" grease lubricated roller bearing conversion kits for roller mills

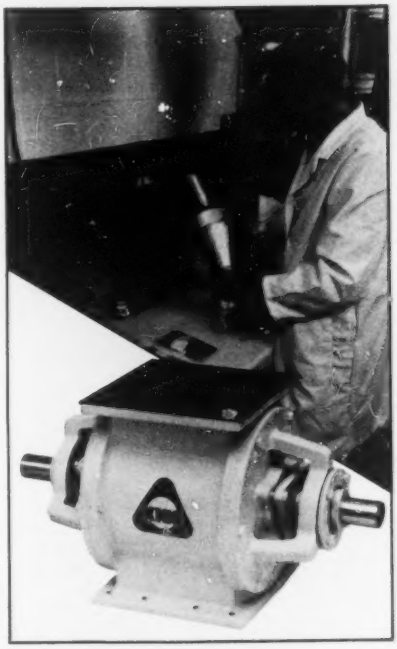
WHAT'S IN A NAME?
A lot when the name is **KICE.**

History

Kice Industries was started more than 40 years ago by an inventive millwright. The company developed the long-cone cyclone collector and the Kice Multi-Aspirator. As new products gained respect, the business grew on hard work and satisfied customers.



Experience

Over the years, Kice Industries has been on the cutting edge of change. We have discovered better ways to build our products, as well as better products to build. Kice equipment is at work 24 hours a day, all over the world. And, Kice service is world famous.

Qualifications and Facilities

Members of the Kice team all have specialized degrees in milling, engineering or other closely related fields. Working with customers to solve their problems is our Engineering and Design group's top priority. An in-house test lab and specialty equipment allow us to establish a thorough understanding of your product's characteristics. This information is combined with your production goals to design exactly the right system for any requirement.

From the elevator to the mill; from mill through the bakery; **Kice** is a name you can count on!

THE FALLING NUMBER VALUE

FOR GRAIN SILOS, a fast and sure system for sprout detection at harvest time.
AT FLOUR MILLS, the only really simple method to calculate the alpha-amylase activity in flour mixtures or to decide the amount of malt to be added. It allows you to predict optimum baking results.

The FALLING NUMBER VALUE is a crucial factor both in production and processing and in grain and flour trading.

The FALLING NUMBER TEST is the international standard method for the determination of the alpha-amylase activity. A quality grading system used all over the world. It is standard in the USA and most European countries.

The FALLING NUMBER SYSTEM is an investment that pays off fast.

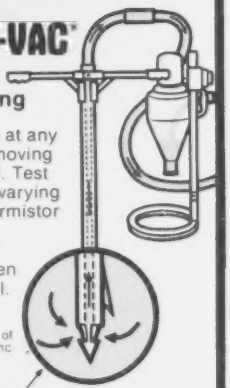
DEPENDABLE
Grain Handling Equipment

RELI-A-SENSE™
Bin Level Sensor
A safe, very reliable, solid-state, low voltage unit. Cannot ignite dust. Blend from multiple bins without surprise endings. Very easy to install at all levels, in spouts and as overflow indicators.

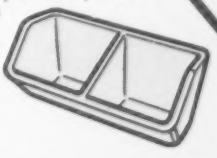
PROBE-A-VAC®
for Fast, Easy Sampling
Obtain samples at any depth without moving tons of material. Test temperature at varying depths with thermistor on tip. Install temperature cables when bin is full.
* Reg. TM of Cargill, Inc.



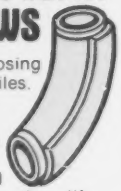
Collect your sample from any depth here.

ORIGINAL RHINO HYDE®
Elastomeric Sheeting
Tough, resilient and economical. The best liner in the market.

EVERWEAR® BUCKETS
The buckets that won't kick the bucket. Proven to outlast steel, nylon and plastic. Easily handles grain, pellets, soybean hulls, and fertilizers. Non-static, non-stick.



CERATHANE® Ceramic-Backed ELBOWS
No worry about losing individual ceramic tiles. Outer cavity filled with Cerathane resists wear and increases elbow life.



Contact any one of our sales team for information on Rhino Hyde® products and the name of your nearest distributor.

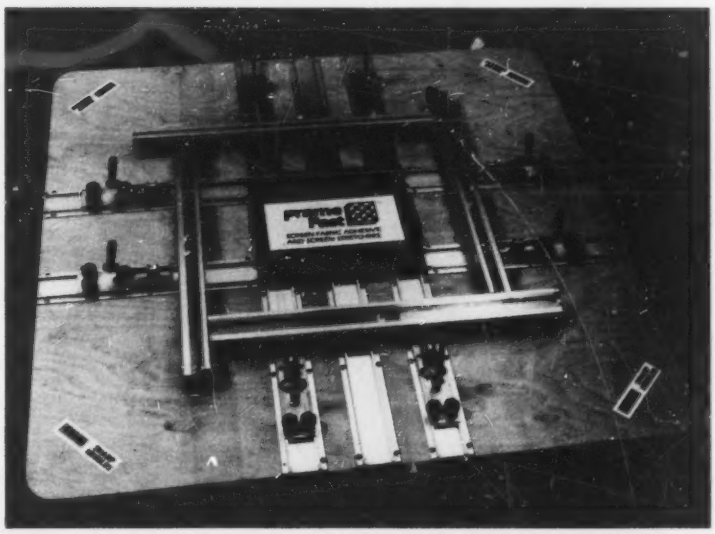
CLOTHE FRAMES IN MINUTES WITHOUT STAPLES!



New FRAME-FAST® System stretches and bonds fabric to frames in minutes

Simple hand clamps pull needle bars, stretching fabric evenly, instantly, over your centered frame. Bead on FRAME-FAST Adhesive, spray it with Activator, and it's ready to cut free and use in less than 2 minutes! Total surface bond gives precise tension that takes tough wear.

This amazing system (new to milling) has already taken the screen printing industry by storm. It works! Save prep time, labor, and $$$!
